LET'S GET IN OUR SWIMSUITS!
CLEANER & SAFER
WATER FOR EVERYONE!

FOR HYGIENE PURPOSE:

- ✘ Swimwear reduces the risk of **contaminating** the pools with waterborne illness and contaminants.
- ✘ Non-Swimwear material can hold **detergents, dye, germs & bacteria** which affects water balance & clarity. Material such as cotton will break down in water and clog the pool's water system.

FOR SAFETY PURPOSE:

- ✘ Non-Swimwear material absorb a lot of water, it can become heavy, making swimming more difficult and **increase the risk of water entrapment**.
- ✘ Swimwear is the appropriate attire for water activities so that your movements are not weighed down.
