

# Breakout The Curve Spy Game

As a group of spies, you and your team have been tasked with finding out what lies behind the LUDDITE cult, a sinister group founded by Harold in the wake of the Y2K fear, with the group teaching their followers to embrace the anti-technology ways and severely punishing followers that use technology.

In Spy Game, you must use your wits and skills to break into a secured location, sneak away from the patrolling guards, and to accomplish the mission that has been given to you!

To finish your mission, you must also overcome numerous challenges that will distract you from the mission. Physical obstacles such as rope bridges and climbing nets will challenge your physical skills while some puzzles and tasks will also challenge your brain and quick timing skills. You must overcome these challenges while also keeping track of time and the guard! However, always remember that the goal is to complete the mission, so if you find a way to finish the game that bypasses the obstacles and puzzles, go right ahead!
