

Exhibitions at the American Museum of Natural History

These exhibitions are included with your **General Admission** ticket option, and are open for viewing throughout the year. You don't need to make any additional purchases to explore the exhibits listed below.

1. **Apex Stegosaurus Fossil**

Apex is a 150 million-year-old *Stegosaurus* fossil. Measuring 11.5 feet tall and 27 feet long, it's one of the most complete and well-preserved *Stegosaurus* specimens ever discovered.

2. Extinct and Endangered: Insects in Peril, by Levon Bliss

Get a chance to see the wonderful insects that keep our ecosystems thriving in microscopic detail on a macroscopic scale. Each photograph of these 40 endangered species is made using up to 10,000 individual images.

3. Grounded by Our Roots

The exhibit is curated with 13 pieces that showcase contemporary Indigenous art inspired by the rich visual arts traditions of the Northwest Coast. The collection includes sculptures, paintings, clothing, and prints.

4. Opulent Oceans

The exhibit features illustrations from explorations of European scientists from their voyages around the globe, showcasing their discovery of newfound marine life. Their journey started 400 years ago, but the beauty and knowledge from the illustrations are used and appreciated even today.

5. The Changing Museum

Visit The Changing Museum exhibit to understand more about the nuances that go into building a collaborative collection that represents and respects the culture, and its artifacts, and upholds the traditions of Indigenous peoples of the land.

6. What's in a Name?

Dive into the complexities of scientific nomenclature, with a special focus on insects, through rare books and illustrations. Make sure to see the whimsical model of a longhorn beetle and a screenprint of a rare butterfly by Andy Warhol when you visit!

7. The Origami Holiday Tree

A yearly holiday feature, this year's origami tree, *Jumping for Joy*, stands 13 feet tall and is filled with origami ornaments. The ornaments include the newly discovered leaping leech, cicadas, kangaroos, porpoises, rabbits, and so many more species! Keep an eye out for origami models of iconic Museum exhibits: the Blue Whale and the *T-rex*.

(November 25, 2024 to January 22, 2025)

8. Ice Cold: An Exhibition of Hip-Hop Jewelry

The exhibit celebrates 50 years of hip-hop with a collection of iconic pieces of jewelry, like Notorious B.I.G.'s legendary gold 'Jesus piece,' and Nicki Minaj's 'Barbie' pendant. Watch the evolution of hip-hop jewelry over 50 years, from oversized gold chains to record label pendants made with diamonds and platinum.

(May 9, 2024 – January 5, 2025)

9. Portraits on Climate and Health: Dreams We Carry

Explore portraits and personal narratives of climate change with testimonies from individuals you can listen to, recorded right before Climate Week NYC. The exhibit also features portraits of Indigenous land stewards and scientists at the Museum.

(Open through early 2025)

(The Hayden Planetarium will be closed from January 3 to February 16, 2025)
