

# How to install an eSIM on a device?

 Connect your device to Wi-Fi / Mobile Data and make sure you have a good WiFi / network connection

## Android

Please prepare other device, e.g. another phones, tab, or laptop to scan

- 1 Go to “Settings” > Tap “Add Data Plan”
- 2 Scan eSIM QR code (Or read the code from photo album)
- 3 Choose your eSIM default line
- 4 Select your eSIM for Mobile Data
- 5 Finished
